

ABSTRACT

A method and terminal for displaying information on a display, where the
5 information is provided with elements. An element is either having a
continuous length presenting a length which is equal to or greater than the
size of said display, or a wrapped length presenting a length which is less
than the size of said display. The display is further provided with a user
interface having a menu structure of items. The user interface is provided with
10 a selectable continuous length item and/or and a wrapped length item. The
information is displayed according to the selection made in the menu structure
of the user interface, in order to allow the user to toggle between continuous
length and wrapped length.
